Election/Restriction

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-14 and 30-31, drawn to a capsule, a stopper and a receptacle.

Group II, claim(s) 15 and 17, drawn to the stopper further comprises a hemisphere protective cover with at least one meridional indentation.

Group III, claim(s) 16-19 and 21, drawn to the stopper further comprises a cylindrical base plate, a ring-shaped skirt.

Group IV, claim(s) 22-24, drawn to the stopper further comprises the base part includes a first opening, closing means, a push button with a hook.

Group V, claim(s) 25, drawn to the stopper further comprises the protective cover connected to the base part by at least one cover hinge.

Group VI, claim(s) 26, drawn to the stopper further comprises a security ring.

Group VII, claim(s) 27, drawn to the stopper further comprises at least one anti-tamper device.

Group VIII, claim(s) 28, drawn to the stopper further comprises the protective cover and the deformable membrane being produced from one or more translucent, preferably transparent materials.

Group IX, claim(s) 29, drawn to the stopper further comprises at least one tooth-shaped element designed to facilitate breakage of the pierceable cap.

2. The inventions listed as Groups I to IX do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the special technical features of each Group are listed above. However, the special technical relationship that is common among Groups I to IX for example a stopper for a receptacle including a base plate for fixing on the receptacle and closing the receptacle by means of the capsule and since such features as claimed by applicant lack novelty over The Japanese Publication Number 2000-217885 and hence lacks unity of invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
